

U.S.: The second longest cycle on record

U.S. GDP expanded at a robust clip of 3% in Q3 2017. It's now been 118 months since the previous recession and some market pundits are wary that the next downturn could be just around the corner. After all, the current business cycle became the second longest ever observed in U.S. history in Q3, exceeded only by that of the 1990s which lasted 128 months (July 1990 to March 2001). According to the NBER, the average length of a business cycle since 1945 is 68.5 months (peak to peak) - chart. So yes, this cycle is getting long in the tooth.

U.S.: The second longest business cycle on record

Duration of economic cycles since 1945 (peak to peak)

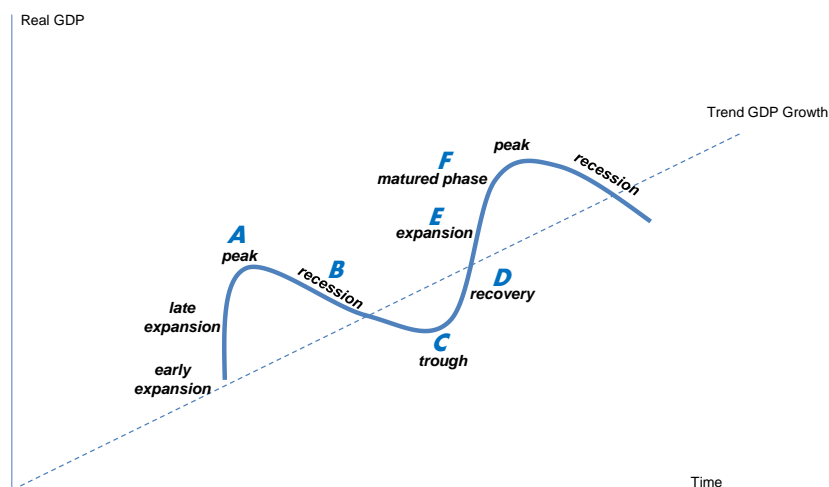

NBF Economics and Strategy (<http://www.nber.org/cycles.html>)

Sill, making a recession call based on duration alone is way too simplistic and prone to error. As the chart below shows, the anatomy of a business cycle is best illustrated as follows: A: The economic peak → B: The recession → C: The economic trough → D: The recovery → E: The expansion phase → F: The matured phase of the expansion.

Where are we in the business cycle?

Anatomy of a business cycle

NBF Economics and Strategy

What's critical to keep in mind is that the duration of the different phases can vary widely from one business cycle to another. Even if we acknowledge that the U.S. economy has entered the matured phase of cycle (letter F), we would argue that it has only recently done so. Case in point, the latest U.S. NIPA report revealed that for the first time in a decade, the level of real GDP in Q3 finally surpassed its potential - a development normally associated with the beginning of the matured phase of the cycle. As shown on the chart below, the current business cycle is characterized by an unusually long recovery (letter D) and a protracted expansion (letter E). The matured phase has only recently begun. We have shown previously that the average duration of the matured phase of an economic cycle in the U.S. since the early 1960s is 36 months (estimated using the deviation of the unemployment rate from NAIRU).

U.S.: GDP exceeds potential for the first time in a decade

Actual vs. potential* real GDP

At this juncture, we take comfort from the fact that the yield curve remains steep despite a positive output gap (chart). We are nowhere near inversion, a powerful signal of an incoming downturn. This bodes well for growth over the coming year. So unless a policy mistake happens soon, the current business cycle is on track to become the longest on record.

U.S.: Yield curve unusually steep at this point in the cycle

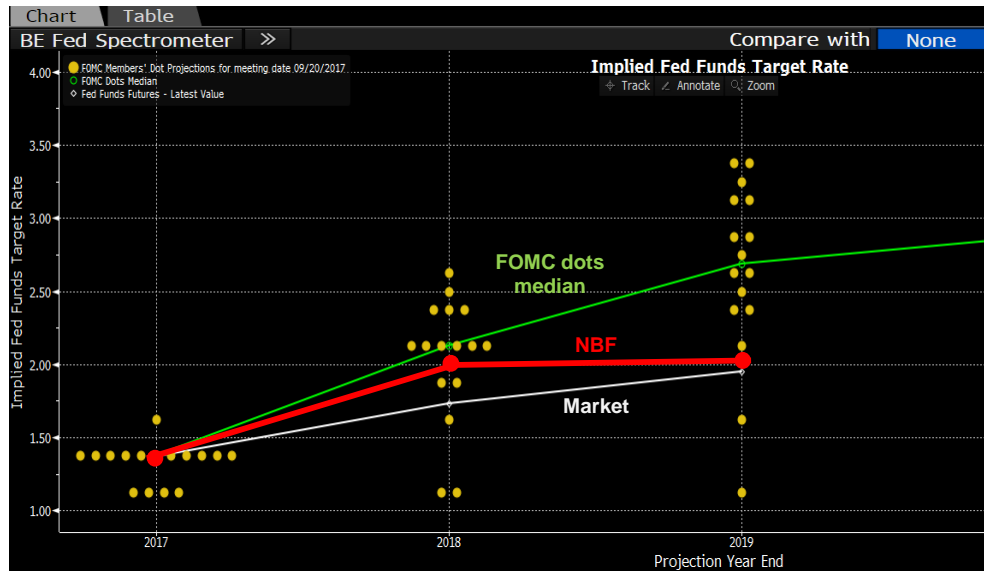

Output gap* vs. yield curve (10-year Treasury yield less 2-year rate)

Of course, the relatively steep curve reflects market expectations that differ from current FOMC guidance when it comes to the amplitude of upcoming rate hikes. At this writing, the market sees the overnight rate being raised about 50 bps between now and next year. That compares Fed guidance of 100 bps when using the median of the FOMC dots and the 75 bps expected by NBF Economics & Strategy (chart).

U.S.: Markets and Fed don't see eye-to-eye

Expectations for level of the fed funds rate

NBF Economics and Strategy (data via Bloomberg)

The actual outcome for interest rates will at the end of the day be dictated by inflationary pressures. Though inflation as measured by the core PCE deflator has been extremely tame so far in this business cycle, recall that we have only recently entered the matured phase of the economic cycle, a period normally conducive to higher inflation (chart).

U.S.: Core inflation tends to move higher at this point in the cycle

Core PCE deflator vs. output gap*

Q3 earnings is still very good

We are now more than halfway into the Q3 earnings season and the results continue to come in on the strong side. 74% of companies are beating on the earnings front and 67% are reporting stronger-than expected sales. Earnings so far in Q3 are averaging 8.4% growth vs. 6.3% for sales (table). Recall that at the start of the reporting season, the bottom-up consensus was calling for earnings growth of 4.2% vs. 4.4% for revenues according to Thomson Reuters.

U.S.: Q3 earnings season remains better than expected

Q3 earnings season for the S&P 500 (as of October 27)

Canada: The BoC opts for dovish tone (again)

The Bank of Canada left its overnight rate at 1.00% last week. In its updated Monetary Policy Report, the central bank raised its growth forecasts from 2.8% to 3.1% for 2017 and from 2.0% to 2.1% for 2018. However, uncertainties about geopolitical developments as well as fiscal and trade policies (read NAFTA) remained sources of concern for the Bank. In its press release, the BoC acknowledged that inflation “has picked up in recent month” and envisaged a return to the 2.0% target in the second half of 2018. Nevertheless, Governor Poloz said that, with inflation running below target, “we [the Governing Council] continue to be more preoccupied with the downside risks to inflation”. In doing so, he clearly indicated a bias to delay further rate hikes. In light of that dovish tone, we have pushed the timing of the next rate hike to January (60% odds), but we still see the overnight rate ending 2018 at 2%. If we are correctly gauging upcoming fiscal momentum and the impact of the biggest minimum wage increase in 50 years in Ontario, growth and inflation will be stronger than what is currently acknowledged by the Bank of Canada. So expect another about face from Mr. Poloz in 2018. The BoC’s language had a material impact on the currency again last week but we still see our current trading range of 1.20-1.30 holding for CADUSD.

Canada: BoC induces currency volatility

General – National Bank Financial (NBF) is an indirect wholly owned subsidiary of National Bank of Canada. National Bank of Canada is a public company listed on Canadian stock exchanges.

The particulars contained herein were obtained from sources which we believe to be reliable but are not guaranteed by us and may be incomplete. The opinions expressed are based upon our analysis and interpretation of these particulars and are not to be construed as a solicitation or offer to buy or sell the securities mentioned herein.

Research Analysts – The Research Analyst(s) who prepare these reports certify that their respective report accurately reflects his or her personal opinion and that no part of his/her compensation was, is, or will be directly or indirectly related to the specific recommendations or views as to the securities or companies.

NBF compensates its Research Analysts from a variety of sources. The Research Department is a cost centre and is funded by the business activities of NBF including, Institutional Equity Sales and Trading, Retail Sales, the correspondent clearing business, and Corporate and Investment Banking. Since the revenues from these businesses vary, the funds for research compensation vary. No one business line has a greater influence than any other for Research Analyst compensation.

Canadian Residents – In respect of the distribution of this report in Canada, NBF accepts responsibility for its contents. To make further inquiry related to this report, Canadian residents should contact their NBF professional representative. To effect any transaction, Canadian residents should contact their NBF Investment advisor.

U.S. Residents – With respect to the distribution of this report in the United States, National Bank of Canada Financial Inc. (NBCFI) is regulated by the Financial Industry Regulatory Authority (FINRA) and a member of the Securities Investor Protection Corporation (SIPC). This report has been prepared in whole or in part by, research analysts employed by non-US affiliates of NBCFI that are not registered as broker/dealers in the US. These non-US research analysts are not registered as associated persons of NBCFI and are not licensed or qualified as research analysts with FINRA or any other US regulatory authority and, accordingly, may not be subject (among other things) to FINRA restrictions regarding communications by a research analyst with the subject company, public appearances by research analysts and trading securities held a research analyst account.

All of the views expressed in this research report accurately reflect the research analysts' personal views regarding any and all of the subject securities or issuers. No part of the analysts' compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this research report. The analyst responsible for the production of this report certifies that the views expressed herein reflect his or her accurate personal and technical judgment at the moment of publication. Because the views of analysts may differ, members of the National Bank Financial Group may have or may in the future issue reports that are inconsistent with this report, or that reach conclusions different from those in this report. To make further inquiry related to this report, United States residents should contact their NBCFI registered representative.

UK Residents – In respect of the distribution of this report to UK residents, National Bank Financial Inc. has approved the contents (including, where necessary, for the purposes of Section 21(1) of the Financial Services and Markets Act 2000). National Bank Financial Inc. and/or its parent and/or any companies within or affiliates of the National Bank of Canada group and/or any of their directors, officers and employees may have or may have had interests or long or short positions in, and may at any time make purchases and/or sales as principal or agent, or may act or may have acted as market maker in the relevant investments or related investments discussed in this report, or may act or have acted as investment and/or commercial banker with respect thereto. The value of investments can go down as well as up. Past performance will not necessarily be repeated in the future. The investments contained in this report are not available to retail customers. This report does not constitute or form part of any offer for sale or subscription of or solicitation of any offer to buy or subscribe for the securities described herein nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever.

This information is only for distribution to Eligible Counterparties and Professional Clients in the United Kingdom within the meaning of the rules of the Financial Conduct Authority. National Bank Financial Inc. is authorised and regulated by the Financial Conduct Authority and has its registered office at 71 Fenchurch Street, London, EC3M 4HD.

National Bank Financial Inc. is not authorised by the Prudential Regulation Authority and the Financial Conduct Authority to accept deposits in the United Kingdom.

HK Residents – With respect to the distribution of this report in Hong Kong by NBC Financial Markets Asia Limited ("NBCFMA") which is licensed by the Securities and Futures Commission ("SFC") to conduct Type 1 (dealing in securities) regulated activity, the contents of this report are solely for informational purposes. It has not been approved by, reviewed by, verified by or filed with any regulator in Hong Kong. Nothing herein is a recommendation, advice, offer or solicitation to buy or sell a product or service, nor an official confirmation of any transaction. None of the products issuers, NBCFMA or its affiliates or other persons or entities named herein are obliged to notify you of changes to any information and none of the foregoing assume any loss suffered by you in reliance of such information.

The content of this report may contain information about investment products which are not authorized by SFC for offering to the public in Hong Kong and such information will only be available to, those persons who are Professional Investors (as defined in the Securities and Futures Ordinance of Hong Kong ("SFO")). If you are in any doubt as to your status you should consult a financial adviser or contact us. This material is not meant to be marketing materials and is not intended for public distribution. Please note that neither this material nor the product referred to is authorized for sale by SFC. Please refer to product prospectus for full details.

There may be conflicts of interest relating to NBCFMA or its affiliates' businesses. These activities and interests include potential multiple advisory, transactional and financial and other interests in securities and instruments that may be purchased or sold by NBCFMA or its affiliates, or in other investment vehicles which are managed by NBCFMA or its affiliates that may purchase or sell such securities and instruments.

No other entity within the National Bank of Canada group, including NBF, is licensed or registered with the SFC. Accordingly, such entities and their employees are not permitted and do not intend to: (i) carry on a business in any regulated activity in Hong Kong; (ii) hold themselves out as carrying on a business in any regulated activity in Hong Kong; or (iii) actively market their services to the Hong Kong public.
